

36" External Blower Stainless Steel Range Hood Shell

Professional style that fits under any cabinet. True professional style and performance has never been easier to bring home with the E60000 range hoods, in 10" under-cabinet versions. Styling is fresh and modern, yet designed to easily complement popular pro-style cooking products. These models come with integrated internal blowers or dedicated external blower capability. Both embody professional features such as powerful blowers, baffle filters, brilliant halogen lighting and variable speed controls. And while you won't see this feature it is hard to miss the quiet operation—two Sones or less at normal speed. To carry the professional theme even further, select the optional stainless steel backsplash with adjustable shelving. When you want professional style and performance, trust BROAN to cover every detail.

E60E36SS

- 18" wall-mount design, Brushed stainless steel finish
- Dedicated models (E60E) in all widths for use with external blower options—choice of eight, from 280–1500 CFM (Blowers sold separately)
- 600 CFM internal blower is included on all internal models (E60), 1200 CFM on "T" versions
- Bright halogen lighting; Two 50-watt bulbs (purchase bulbs separately)
- Pro-style, dishwasher-safe baffle filters with removable grease drip rail
- Variable speed control remembers last setting—blue power-on indicator light: Heat Sentry™ detects excessive heat and adjusts blower speed automatically
- Optional pro-style backsplash and decorative 12" soffit flue
- Designed to duct out of the hood shell in either horizontal or vertical direction with any blower configuration. (Blower sold separately)

		UL Status	Yes
		Voltage	120

Additional Features

HVI-2100 CERTIFIED RATINGS comply with new testing technologies and procedures prescribed by the Home Ventilating Institute, for off-the-shelf products, as they are available to consumers. Product performance is rated at 0.1 in. static pressure, based on tests conducted in AMCA's state-of-the-art test laboratory. Sones are a measure of humanly-perceived loudness, based on laboratory measurements.
